Final Project Name : Portfolio

CSE-0402 Summer 2021

Ahasanul Bari Rifat
Department of Computer Science and Engineering
State University of Bangladesh (SUB)
Dhaka, Bangladesh
rifatcse007@gmail.com

Abstract—This is a website on which you can find my personal details about graduation, skills, working experience and my achievements. The website contains is six sections and five pages
in total. Pages are home, about me, services, skills and contact me
n
Index Terms—CSs. HTML, JavaScript

I. INTRODUCTION

Portfolios aren't just for creative professionals, everyone should have oneA professional portfolio is a tool that can help bring your stories to life, in a tangible way. By showing physical examples of your work and accomplishments, you'll be better able to prove your skills and experiences.
In this website we will see it has six sections and live pages named home, about me, services, skills and contact me.The website is fully responsive and compatible for all devices like mobile phones,tablets and computers. And all hover effects are pure hand coded.

II. LITERATURE REVIEW

I have taken some of their ideas and code for those animations and features. The viewed websites has some common features like- Auto typed animation, buttons become big after hover on it, skill showing by percentage, contact with social media profile buttons etc.

III. PROPOSED METHODOLOGY

In this website I have used HTML for creating the main structure of the website. Used CSS for changing colors, style, weight, font-family, giving some animations and hover effects etc.

IV. CONCLUSION AND FUTURE WORK

Throughout this portfolio you can see that my work was a progress from the rough draftto the polished draft. All of the work I composed onto this file was the journey I went throughthis course. Each project has a prompt and its own individual purpose for us to seek andcomplete. Every material I worked on had its own different skills.
In this project ijust create a interface by using CSS,HTML, JavaScript.
So in future, I will use PHP, MySQL and laravel framework to make the website dynamic.
